

Assignment Web 2

Due: Tuesday February 7th before class in dropbox for Web 2 on Learn@UW-Stout.

Class: CS-248 Web and Internet Programming

Value: 100 Points

Notes: The next 100 points will be earned through formatting of xhtml pages with a cascading style sheet.

Assignment: Create your own web page in HTML 5 matching the pdf of the About Me web page shown under content. Use the HTML 5 syntax. Verify HTML requirements met through Dreamweaver or validation site.

Requirements: Detailed formatting will be done in the next project with cascading style sheets applied to this document.

Details:

The page has a layout of two columns and three rows through the use of a table without displaying borders. The first row has hometown and education. Row two has My Favorites and a nested table followed by goals. Row three is an image spanning both columns. There is content on the page outside of this formatting table.

Use the following tags to structure data. Look at example provided in D2L.

- Your name in h1.
- Create an outer formatting table to structure the page. I should have no borders.
- h2 - My Favorites.
- h3 - Movies, Hobbies, and Websites,
- Lists of specific movies, hobbies, and websites.
- p – Description of my goals.
- Inner schedule table – Use the table from Web 1
- Any non-offensive image may be used.
- Be sure to notice the equations at the bottom of the page for practice
- Validate your file to confirm proper nesting of HTML tags. (10 points)
